PROFESSIONAL SUMMARY

Computer Science undergraduate (B.E. 2027, CGPA 7.4) and hands-on AI/full-stack builder. Shipped end-to-end RAG pipelines, agentic multi-agent systems, and real-time speech processing applications — achieving sub-100ms vector retrieval with ChromaDB and automating deployments via Docker + GitHub Actions CI/CD. Proficient in Python, LangChain, LangGraph, RAG, prompt engineering, FastAPI, and LLM evaluation. Seeking AI Engineer Internship.

TECHNICAL SKILLS

Languages	Python · JavaScript / TypeScript · SQL · HTML · CSS
AI / GenAI	LangChain · LangGraph · RAG · Agentic AI Systems · Multi-Agent Orchestration · Prompt Engineering · HuggingFace
LLM & APIs	SentenceTransformers · PyTorch · NLP · Computer Vision Groq LLM · Gemini API · OpenAI-compatible APIs · Anthropic Claude · LLM Evaluation (retrieval precision, latency benchmarking, token usage)
Vector DBs	ChromaDB · FAISS · Pinecone (familiar) · Qdrant (familiar)
Backend	FastAPI · Flask · REST APIs · WebSockets · scikit-learn
Frontend	React · Vite · TypeScript · Tailwind CSS · HTML · CSS
Databases	MongoDB · PostgreSQL · SQLite
DevOps	Docker · Git · GitHub Actions (CI/CD) · Render

EXPERIENCE

Undergraduate Researcher

Ghousia College of Engineering — CS Department · 2024

- Conducted comparative performance analysis of Linear Congruential Random Generator (LCRG) algorithms using Python and Java, evaluating statistical randomness, speed, and period length across implementations.
- Published findings in the Journal of Advances in Mathematics and Computer Science — peer-reviewed research output as an undergraduate.

PROJECTS

AI Agentic Designer (In Progress)

Python · FastAPI · LangGraph · React · TypeScript · Tailwind CSS · Groq LLM · Gemini API

- Building a multi-agent system that generates multipage React + Tailwind websites from natural language prompts using LangGraph orchestration and parallel agent workflows.
- Architected a FastAPI SSE streaming backend with LangGraph state machine managing Plan → Generate → Review agent loop; Gemini and Groq LLMs switchable via environment config.
- Developed a two-panel React/TypeScript frontend with live iframe preview and Monaco Editor code view, enabling real-time agentic output inspection.

RAGChat Assistant

Python · FastAPI · ChromaDB · LangChain · HuggingFace · Groq LLM · Docker · github.com/dawalmalik0405-spec/rag-ai-assistant

- Built an end-to-end FastAPI RAG pipeline with ChromaDB vector search and Sentence Transformer embeddings, achieving sub-100ms document retrieval latency.
- Reduced hallucinated responses by engineering context-isolation prompts, a retrieval-relevance threshold, and hybrid search filtering.
- Containerized with Docker and automated regression testing via GitHub Actions CI/CD pipeline running pytest on every push.
- Implemented LLM evaluation tracking: retrieval precision, response latency, and token usage per query to benchmark pipeline quality.

Eventronix — Event Management Platform

HTML · CSS · JavaScript · Flask · MongoDB · Docker · github.com/dawalmalik0405-spec/event_flow

- Consolidated hackathon, webinar, and conference workflows into a single dashboard with full CRUD REST endpoints supporting multiple event types.
- Designed Flask REST backend with MongoDB document modelling, server-side validation, and role-based access control (RBAC); containerized with Docker.
- Implemented pytest unit tests covering core API endpoints, integrated into GitHub Actions CI pipeline for automated regression on every push.

Real-Time Video Call Audio Translation

Node.js · Python · Vosk · WebSockets · HTML/CSS/JS · github.com/dawalmalik0405-spec/video-call-audio-translation

- Delivered live speech-to-text transcription with sub-200ms caption latency by integrating the offline Vosk model into a Node.js + Python streaming pipeline over WebSockets.
- Enabled fully offline, zero-cost multilingual transcription by streaming partial results to the frontend in real time — no paid cloud STT dependency.

EDUCATION

B.E., Computer Science & Engineering

Ghousia College of Engineering, Bengaluru · Sep 2023 – Sep 2027 · CGPA: 7.4 / 10

- Coursework: Theory of Computation · Data Structures & Algorithms · Databases · Operating Systems

CERTIFICATIONS & PUBLICATIONS

- RAG System Expert Certification — Ready Tensor, Inc.
- Foundations of Cybersecurity · Play It Safe: Manage Security Risks · Networks & Security — Google
- Hackathon: HackerRank Orchestrate — HackerRank
- Performance Analysis of Linear Congruential Random Generator Algorithms (Published) — Journal of Advances in Mathematics and Computer Science
